# Business Internet

## → Internet plans built just for business

Quality Internet is essential for every business but not all Internet plans are built for business. Unlike the big telcos, we're business Internet specialists.

Netmode Business Internet is built for customers that know that advertised download speeds don't mean much if your business data is competing with neighbourhood Netflix traffic over a connection with too many subscribers.

## → National coverage, local outcomes

Netmode Business Internet is available nationally using the nbn™ fixed line and fixed wireless networks, with bandwidth options to suit every business size.

We control congestion at every level of the network to ensure that your Netmode nbn™ service delivers the business outcomes you expect, and our expert 100% Australian support team has direct access to the business nbn™ Network Operations Centre to keep you online 24/7.

## → Connect all your sites and people

We can connect all your business sites using the best connectivity options and technology available, including nbn™ fixed line (HFC or FTTN/C/B/P), fixed wireless, or superfast nbn™ Enterprise Ethernet dedicated fibre built to your site.

## → Looking for more than 'normal' nbn™?

Upgrading to fibre with nbn™ Enterprise Ethernet from Netmode is a game-changer for organisations struggling with outdated connection technology or faced with limited connectivity options due to their location.

**700,000 Australian businesses can get superfast nbn™ fibre to their site with \$0 fibre build cost\* - find out today if your business is one of them!**

\* \$0 fibre build cost subject to nbn™ site qualification and 36 month contract term.

### UNLIMITED & UNCROWDED

Uncrowded subscriber ratios and unlimited data mean you can focus on growing your business without getting bogged down.

### AVAILABLE WHERE YOU ARE

We deal direct with nbn Co so we can quickly connect and monitor all your sites, wherever you do business.

### GET THE BANDWIDTH YOU NEED

We provision plans at the 50Mbps, 100Mbps, and 250Mbps nbn™ speed tiers to suit every business application.

### PRIORITISE CRITICAL TRAFFIC

Our nbn™ Traffic Class configuration options let you prioritise business-critical voice and video traffic.

### BUSINESS FOCUSED SUPPORT

Get expert support from our 100% Australian service desk and network teams, and our trusted local partners.
